Kwik-Wall Hires Industry Configuration Software Expert David Kimball

Springfield, IL, September 8, 2023 - Kwik-Wall Company is proud to announce the hiring of David Kimball to the new position of Director of Software Development.

Dave comes to Kwik-Wall with a wealth of operable partition software development experience. Dave spent the past year working for Dorma Group as a lead software developer for brands like Modernfold, Skyfold and Huppe. Prior to that, Dave served many drafting and software design roles most recently as the Director of Software Development for Hufcor, Inc.

During his three decades working for Hufcor, Dave developed the Partition Studio® 4 and Partition Studio® 5 custom configurator and estimating systems. Dave's programs provided industry-leading features including the creation of dynamic AutoCAD shop drawings, accompanying REVIT output, freight calculators, automated *Factory Apps*, and "configurator to backend production" data input down to machine level operation (to name just a few).

Dave will combine his expertise with the KW team that will soon launch Kwik-Wall's Configure One software to drive more automation throughout the entire organization that will speed front-end commercial operations, support distributors in servicing architects and GCs, and improve all aspects of quality throughout the manufacturing process.

Please join us in welcoming Dave to the Kwik-Wall family.
